### About Us.

Pre-cut Shims make shaft alignment and other machine levelling tasks easier and more cost effective.

Made from high-grade materials, in sizes to suit almost any type of machine.

Stephens Gaskets are a leading shim supplier, offering a variety of options to choose from, including our pre cut shims. We have over fifty years of experience in providing shims for a wide range of clients. In fact, over the decades, we've provided our services to hundreds of clients both in the UK and worldwide. Furthermore, we remain dedicated to providing an affordable, reliable and effective service to all of our customers, no matter how big or small.

If you would like more information on our pre-cut shims, or any other of our services, please contact us on <u>0121 544 5808</u> OR <u>contact us online</u>.

### Benefits.

#### **COST SAVINGS**

It has been shown that pre-cut shims are around four times more cost effective than hand-cut machine shims in time alone. You only need to think about how long it takes to find shim material of the required thickness; mark it; cut it from the sheet stock; deburr and flatten it. How much simpler and quicker it is to select one that's all ready for use from the shelf. And, remember that installation and repair are also made easier and more straightforward with the pre-cut version.

#### TIME BETTER SPENT

It's not just the cost involved in producing hand cut shims either. Using pre-cut shims allows the time that would have been spent on hand-cutting, to be used more productively and effectively for your business.

#### **EASIER STOCK CONTROL**

Keeping track of pre-cut shims — which come packed in special cases, each containing shims of different thicknesses separated by clearly visible dividers — is far easier and less time consuming than running an inventory of sheet stock.

### Benefits.

#### SAFER WORK PLACE

Our pre-cut shims also contribute to safe working practices, reducing the danger of injury during installation and cutting. All are finished with rounded corners and are perfectly deburred for maximum safety.

#### **MORE RELIABLE**

Pre-cut shims also offer increased machine reliability. After all, the more exactly the machines are aligned, the longer they are likely to run without breakdown or damage.

#### **INCREASED ACCURACY**

When accuracy to hundredths of a millimetre is vital in providing optimum support for machine feet during rotating operations; even the merest fraction of inaccuracy can cause vibration, which in turn may result in breakdowns and expensive machine downtime.

The use of pre-cut shims offers consistently accurate positioning, so reducing the likelihood of such disasters.

### The Facts.

Our line of shimming materials contain different sizes with slots to fit machine bolts: Metric M8, M12, M1I8,M27,M36 & M52 or Imperial '/2", is", 1's" and P/s". This means that almost any type of machine foot is accommodated. The user can choose between solid stainless steel shims or laminated shims.

#### Solid shims in high grade stainless steel (BS 1449 PT2 1981 304 S15)

Solid shims, individually marked with thickness, are available in each size. They come in packs of 10 per thickness:

- Metric from 0.025mm to 3.00mm.
- Imperial from 0.001" to 0.120"

A selection of thickness' and sizes are also available in packs of each size, or in refillable aluminium framed cases fitted with clearly marked slots to hold individual sets of shims.

#### Laminated shims and sheets

Laminated shims are available in each size in pre-cut packs of 20, or uncut sheets, in either brass or stainless steel. Each shim has a thickness of 1.00 mm divided into I2 layers. Laminated shims always fit - just peel off to the required thickness.

### Pre-Cut Shims at a Glance.

- Pre-cut shims are made of high-quality stainless steel to prevent corrosion from exposure to acids or alkalis
- pre-cut shims are available in several machine foot sizes, each with different thickness options to give exactly the right alignment correction facility for almost any machine
- pre-cut shims are easily and quickly identified by permanent marks indicating thickness and dimensions
- pre-cut shims are completely flat, ensuring stability and consistent machine support over the full surface of the shim
- pre-cut shims are burr-free and have specially rounded corners to avoid injury to operatives during alignment positioning
- pre-cut shims have an extraction and insertion tab to facilitate positioning and removal, each clearly marked with thickness
- pre-cut shims are available in many pre-packed options to suit your requirements
